

### FEATURES:

- Compatible with all types of water based disinfection
- Highly Effective infection control
- Enables the sterilization of every corner of the surrounding area
- Applicable to any place where instantaneous drying is required

### SPECIFICATION:

- Motor Output : 1,250 W
- Capacity of Chemical : 3 Litres
- Injection Distance : 5 ~ 10 M (16.6 – 32 ft)
- Particle Size : 10 ~ 50  $\mu$ m
- Power Source : 100V, 110V, 220V, 240V
- Size : 16 cm x 55 cm x 25 cm
- Weight : 3.0 Kg

**Disinfection/sterilization:** It enables injection of insecticide, germicide, detergent, antibiotic, etc. to every corner inside and outside of the cattle shed and building. Its mobility from the people and vehicles that move in and out constantly ensures protection against foot-and-mouth disease and infectious pathogens.

**Application/Spray:** It can be utilized for the application of resistant and nutritional supplements. Also, it enables spraying of dynamic materials including water-based and oil-based materials while functioning as a humidifier and microorganism sprayer
